

Document an existing experience

Narrow your focus to a specific scenario or process within an existing product or service. In the **Steps** row, document the step-by-step process someone typically experiences, then add detail to each of the other rows.

Project Name - A Novel Method For Handwritten Digit Recognition System

As you add steps to the experience, move each these "Five Es" the left or right depending on the scenario you are documenting.

Browsing, booking, attending, and rating a local city tour	Entice How does someone initially become aware of this process?	Enter What do people experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?
Steps What does the person (or group) typically experience?	users search for handwritten recognition tool scan the image to get digit from it	the customer will either upload the image or one can to scan using camera the client will see the machine readable numbers	examining and processing the image the image is scanned for digits	the customer will be happy after the digits are are correctly given in same order recognized	the customer will be satisfed by successfully identifng the right digits
Interactions What interactions do they have at each step along the way? People: Who do they see or talk to? Places: Where are they? Things: What digital touchpoints or physical objects would they use?	website section for uploading images section	upload or scan option for the image	webpage pop-up message image from folders or scan directly using camera	digitized output section which gives the output	the output can be generated again if it is unsatisfed for the user
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me" or "Help me avoid")	please direct me to a home page please help to rescan the blur image	help me scan or upload the image please help me identify these numbers	help with the procedure in any way? help with the some confdence with known digits	help me feel nice and satisfed once I exit the website.	how to share the user experience with others to use this website
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	it's very essential to get correct recognition of digit easy to use and understand the handwritten digits from image	we will have some satisfaction when we receive the right outcome.	works well since it correctly recognizes the digits from difcult handwrittings of various people easy conversion of human handwriting to machine readable form	when the digits are accurately identifed from a difcult handwritting it is exciting.	when we receive the correct digit order it provoke other users to user it
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	sometimes the users will upload blur image. people may find it challenging to upload or scan the image	some individuals have difculty uploading or scanning the phtograph	users will rescan the image many times which consumes time	the digit will not be identifed exactly	while the image is being unclear people experience peer pressure
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	huge amount of dataset with many vareity of handwritings are required	could we receive the image we uploaded?	could you provide any assistance for the process? Is there any virtual tour which explains how to upload image?	if the image is blur then the webpage asks to upload or rescan a clear image	Could you provide a history of recognized digits
